Three small bar charts are displayed side-by-side. The first chart on the left has a y-axis labeled 'Percentage' and an x-axis with categories 'A', 'B', and 'C'. It shows three bars of different heights. The middle chart has a y-axis labeled 'Percentage' and an x-axis with categories 'A', 'B', and 'C', showing three bars of different heights. The third chart on the right has a y-axis labeled 'Percentage' and an x-axis with categories 'A', 'B', and 'C', showing three bars of different heights.

[illegible]

Figure 1: Schematic representation of the experimental design. The diagram shows a sequence of events: a subject is presented with a stimulus (a word), then a response is given (a word), and finally a feedback is provided (a word). The sequence is repeated for multiple trials. The diagram is divided into three main sections: 'Stimulus', 'Response', and 'Feedback'. Each section contains a box with a word, and arrows indicate the flow from one section to the next. The 'Stimulus' section is labeled 'Stimulus' and 'Word'. The 'Response' section is labeled 'Response' and 'Word'. The 'Feedback' section is labeled 'Feedback' and 'Word'. The sequence is repeated for multiple trials, with the words changing from trial to trial. The diagram is labeled 'Figure 1' and 'Schematic representation of the experimental design'.
